

Incubating Rocking & Waving Shakers

Save Incubator Space with Unique Benchtop Incubating Rocking and Waving Shakers

OHAUS Incubating Rocking and Waving Shakers are innovatively designed to incubate samples providing accurate and repeatable results. Rocking shakers provide a controlled see-saw like motion, while waving shakers offer a smooth, low-foaming three-dimensional wave motion. All models feature independent displays with intuitive touchpad controls. Both models include safety features that protect both the user and samples.

Standard Features:

- Electronic control allows simple tilt angle, speed and temperature adjustments while the unit is still running to achieve optimal mixing.
- Achieve reproducible results you can trust. Precisely adjust the tilt angle in 1° increments, vary the speed by 1 rpm and set temperature in 1°C increments with intuitive touchpad controls.
- Innovative speed ramping feature slowly increases speed to desired setpoint to avoid splashing. Smooth rocking or waving motion is maintained with unique, state-of-the-art motor and electronics.
